## WORK EXPERIENCE

### SS Tech Services

3 JUNE - 3 SEP 2024

#### Full Stack Developer Intern

- Designed and developed a feature-rich CRM for the Sales Department using the MERN Stack, integrating a comprehensive Email Chat System and RingCentral for seamless communication. Delivered complete CRUD functionality and advanced features, enabling sales employees to manage tasks efficiently within a single application, improving organizational efficiency by 40%.
- Developed and enhanced multiple web applications utilizing HTML, CSS, Tailwind CSS, and JavaScript, creating responsive and dynamic user interfaces for improved user engagement.
- Delivered three major projects, including:
  - A complete E-Commerce website, improving scalability and data management through bulk data insertion.
  - A frontend application, enhancing user experience by 30% with optimized UI/UX design.
  - A CRM based on MERN Stack, incorporating RingCentral and an advanced Email Chat System with security enhancements using JWT, offering three distinct panels: Super-Admin, Admin, and Agent.
- Managed databases with MySQL, integrating data-driven functionalities to boost user engagement by 20%.
- Integrated REST APIs and payment gateways, including PayPal and Stripe, enabling secure and seamless transactions.
- Leveraged Ant Design for UI component development, improving the visual appeal and usability of applications, leading to higher user satisfaction ratings.
- Enhanced application security by implementing JWT authentication and role-based access, ensuring robust data protection.

## PROJECTS

### [DIGITAL DOCS](#)

- Developed a collaborative application using the MERN Stack, Tailwind CSS, and Socket.io, offering real-time screen sharing, a rich text editor, and document saving functionality, optimized for desktop use.
- Enhanced backend security by 90% through the implementation of token-based authentication and enabled seamless real-time connectivity between users via Socket.io.
- Designed an administrator-driven workflow, enabling the admin to establish connections, notify users of requests, approve or deny access, and manage real-time data exchange while preserving shared documents.
